

The Laboratory Benefit Management Program was developed to help manage appropriate utilization for outpatient laboratory services. As part of this program, the following Decision Support Tests require Prior Authorization or Advanced Notification.

MDX Hawai'i has chosen Beacon Laboratory Benefit Solutions, Inc. (BeaconLBS®) to administer the Laboratory Benefit Management Program. BeaconLBS has developed Physician Decision Support to assist physicians in their test and lab selection based on recognized standards of practice, CMS policies, and the MDX Hawaii Prior Authorization policy.

Ordering physicians must use Physician Decision Support to submit an Advanced Notification or request a Prior Authorization for Decision Support Tests from a network provider authorized to perform them. Physician Decision Support is available as a standalone application to registered users at BeaconLBS.com. It is also integrated with a variety of EHRs and laboratory ordering systems.

An Outcome Summary is automatically generated for Decision Support Tests ordered using Physician Decision Support. It will confirm that Advance Notification was completed or Prior Authorization was requested, if applicable. Rendering providers must confirm receipt of the Outcome Summary for any of the Decision Support Tests prior to performing the tests.

Prior Authorization* (Precertification) Tests

- 4K Score
- Afirma™ Assay by Veracyte
- Breast Cancer Index
- Clonoseq
- Cologuard
- ConfirmMDx Epigenetic Molecular Assay
- CYP2C19 gene
- EndoPredict Breast Cancer Test
- GeneSight® Psychotropic
- Guardant360® Plasma-Based Comprehensive Genomic Profiling
- Hereditary Breast & Ovarian Cancer Testing & Multi-Gene BRCA
- HLA-B*15:02 Genetic Testing
- IHC and Special Stains
- MammaPrint Breast Cancer Recurrence Assay
- Molecular Gene, Statutory Exclusion (single gene & panels)
- Multi-Gene Pharmacogenetic Testing
- Oncotype DX Breast Cancer Test
- Procalcitonin (PCT)
- Progenesa® PCA3 Assay
- Prosigna Breast Cancer Assay
- Tumor Profiling Panels

Advanced Notification Tests

- Chlamydia / Gonococcus, NAT
- Cytology (Non-Gynecological)
- Drug Testing – Definitive Testing
- Drug Testing – Presumptive Testing
- HIV-1, Quantitative, RNA
- HPV, High-risk DNA Detection
- Leukemia / Lymphoma Immunophenotyping Profile
- Pathology – Dermatopathology
- Pathology – Hematopathology
- Pathology – All Other Pathology
- Prostate Specific Antigen (PSA)
- Parathyroid hormone (PTH)
- Testosterone
- TSH
- Free T3
- Free T4
- Thyroid Panel
- UroVysion
- Vaginitis / Vaginosis
- Vitamin B12
- Vitamin D, 25, Hydroxy
